

Safety Scalpel Handles

Yellow Ribbon Winner - Patient/Staff Safety & Education

Ansell Sandel Medical Solutions extends its line of Change-A-Blade® safety scalpel handles with the new No.3L and No.4 handles. The Sandel Safety Scalpel Handles™ offer identical safety features as the original Change-A-Blade and provide added safety to the surgical team during a wider variety of cases. The handles help reduce the incidence of sharps injuries while complying with requirements from OSHA, AORN and the American College of Surgeons. Each safety scalpel handle features a lockable safety shield and provides surgeons the freedom to utilize their preferred choice of blade. These handles allow for uninterrupted puncture-ability and unobstructed field of vision.
