

Desara Sling System

Caldera Medical's Desara® Sling System for stress urinary incontinence offers surgeons outstanding flexibility and ease of use. Desara® can be used with any surgical approach including transvaginal, suprapubic and transobturator. Caldera offers a line of reusable instruments, allowing the surgeon to choose the best approach for each patient. On average, Caldera's Desara Sling System utilizes 94 percent less packaging, significantly reducing waste in the OR and making Desara the perfect Green solution.
