EZ Slide Surgical Table

July 11, 2012

Skytron's EZ Slide 3501C Surgical Table provides 700 pounds of lift and 600 pounds articulation capacity, as well as 21" of top slide for full-body imaging during general and bariatric procedures, reducing the need for multiple support accessories. Additional features include stainless steel and aluminum construction, a table height of up to 45" for the optional Ortho Trax orthopedic extension, and a backlit, one-touch pendant control. An optional carbon fiber leg section attachment is available, as well as a power or lift assist shoulder arthroscopy positioner. Split leg accessories and a full line of general purpose and bariatric table accessories are also available.
