Humbles LapWrap Positioning Pad

Innovative Medical Products has introduced the Humbles LapWrap® Positioning Pad providing more security for the patient and more versatility for the surgical team with its VELCRO® hook and loop material. The Humbles LapWrap® is now laminated on both sides with loop material and has additional hook fasteners on the center cut-out strap providing more options for securing the patient. This allows the positioner's latex-free foam straps to be placed between the operating table and the side rail, wrapped around the side rail and then back onto themselves for extra security.
