

Doctor Communication App

DocBookMD has created an app for doctors by doctors called DocBookMD. The app allows physicians to communicate with each other securely and with full HIPAA compliance, and it works on iPhone, iPad and Android. Everything from X-rays to lab results can be sent from one doctor to another. The app is free for those doctors who are members of their state or county medical society.

For more information, visit www.docbookmd.com. [1]
