

Introcan Safety 3 Closed IV Catheter

B. Braun Medical Inc. has announced its latest development in safety-engineered medical devices, the Introcan Safety® 3 Closed IV Catheter. The new product includes the proven passive protection from needlestick injuries. Advancements in the new Introcan Safety® 3's design include the unique multi-access blood control septum to protect healthcare professionals from blood exposure and an integrated stabilization platform that helps to improve catheter stability and minimize movement within the vessel.
