

## Lead-Free X-Ray Aprons

Wolf X-Ray Corporation introduces Wolf's "GREEN" Lead-Free X-Ray Protective Aprons for medical use. Wolf GREEN Lead-Free Aprons provide the same 0.3mm lead-equivalency protection as traditional leaded aprons, yet weight 25 percent less and pose no hazard to the environment when disposed of. Manufactured in the USA, Wolf uses a lead-free rubber layer, sandwiched between an attractive vinyl front and a tear-resistant cling back. When the apron has reached the end of its life, it can simply be thrown away without fear of adding lead contaminants to landfills. Wolf GREEN Aprons are available in 8 styles, 13 colors and 4 patterns.
