

Moldable Technology Skin Barriers

ConvaTec has announced observational study results showing that use of ConvaTec Moldable Technology™ Skin Barriers helped to maintain skin integrity and improve peristomal skin issues in stoma patients. ConvaTec Moldable Technology™ Skin Barriers with Rebounding Memory Technology™ are the only skin barriers with a patented tri-laminate construction that actively adjusts to the shape and contours of the stoma. ConvaTec Moldable Technology™ Skin Barriers are supported by extensive clinical experience demonstrating their ability to prevent leaks and protect the peristomal skin.
