

Stainless Headed Compression Screw System

Integra LifeSciences Holdings Corporation has announced the Stainless Headed Compression Screw System. This system is designed as a solution for arthrodesis and fracture management across multiple disease states, including midfoot, ankle and hindfoot arthritis. The stainless steel system will feature a midfoot set composed of 4.0mm and 4.5mm diameter screws, and a hindfoot set composed of 6.5mm and 7.5mm diameter screws. All screw diameters will be available in both partially threaded and fully threaded options.
