

## Hazardous Waste Cart

Health Care Logistics offers the customizable Hazardous Waste Cart, a lockable mobile cart that allows staff to properly dispose of varying types of used hazardous materials. Carts can be customized with six different colors and inserts. Open-bottomed inserts allow waste to drop into the waste cans inside the cart. Clear acrylic hinged lids have a security plate designed to deter tampering. The two-door locking Hazardous Waste Cart is made of melamine and features a lock with two keys.
