

## MX Series Workstations

Capsa Solutions has introduced the MX Series, a line of computing and medication workstations. The MX Series offers an open-platform to permit the use of computing hardware including laptops, tablets, thin-client, all-in-one PCs, and small form factor PCs. The MX Series provides a wide array of drawers and bins to customize storage and organization. With a choice of AC Power Platform or DC Power Platform, the MX Series is designed for cord-free run times for uninterrupted surgical case management from pre-op through recovery.
