

Protexis Latex Surgical Gloves

Cardinal Health has introduced a double gloving system, the Protexis™ Latex Blue with Neu-Thera® and Protexis Latex Hydrogel surgical gloves. The Neu-Thera® emollient coating on the bottom layer aids in damp and dry donning and promotes skin moisturization and hand hygiene compliance. Protexis Latex Hydrogel is powder-free, made from natural rubber latex, and is made with Hydrogel, a hydrophilic coating chemically bonded to the interior of the glove which enhances donning lubricity.
