

HoverMatt Half-Matt

HoverTech's HoverMatt® Half-Matt, a shorter version of the original transfer mattress, is ideal for lateral transfers and repositioning in the OR, especially for orthopedics, cystoscopy, labor and delivery and other gynecological or urological procedures. At 45 inches long, the HoverMatt Half-Matt ends right below the buttocks, making it effective but unobtrusive on specialty tables. The disposable Single-Patient Use HoverMatt Half-Matt is now available, providing additional benefits for infection control and nursing efficiency.
