

C-Arm Tabletop Design

Biodex Medical Systems, Inc. has announced a new C-Arm tabletop design for Surgical C-Arm Tables 840, 846 and Pain Management C-Arm Table 870. These tables are now offered with the option of two styles of tabletop: rectangular and classic. The rectangular tabletop design offers additional space to allow for even image quality for long leg runoff studies. The classic contoured tabletop design allows C-Arm positioning for the closest possible patient access, achieving optimum image resolution.
