

TMM6 Power Drive Stretcher-Chair

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

TMM6 Power Drive Stretcher-Chair

TransMotion Medical, Inc. has introduced the TMM6, a stretcher-chair with both power drive and power positioning. Now staff can drive patients throughout a healthcare facility with just one finger and position them from supine to upright, as well as adjust height at the touch of a button. The TMM6 Power Drive Chair is a chair, motorized transport device, procedure table and stretcher all-in-one.
