

AQUACEL Ag EXTRA

ConvaTec has announced the AQUACEL® Ag EXTRA™ wound dressing that incorporates strengthening fibers, making it especially appropriate for managing highly exuding wounds when strength and absorbency is needed most. The dressing is designed to be nine times stronger and to give an increased absorbency of 50 percent over current AQUACEL Ag wound dressing. AQUACEL Ag EXTRA wound dressing with ionic silver will be specifically suitable for managing moderate to highly exuding wounds where infection by deadly bacteria is identified or at risk to be present.
