

G-Sleeve

Patient Safety Gear

Patient Safety Gear, Inc. has introduced the G-sleeve, designed to eliminate the risk of potential injury when treating mastectomy, lumpectomy with lymph node removal and dialysis. The G-sleeve is an alerting tool used to signal that there is to be no blood draws, blood pressure or intravenous on the patient. It can be used pre-operatively, peri-operatively, post-operatively as well as on the surgical floor.
