

iDrive Ultra Powered Stapling System

Covidien

Covidien has introduced the iDrive Ultra Powered Stapling System. The system is a fully powered, reusable, battery-operated endoscopic surgical stapler. Featuring one-handed push-button operation, it eliminates manual firing force and improves maneuverability when compared to traditional endomechanical staplers. The iDrive Ultra powered stapling system is designed for multi-patient use, streamlining operating room inventory management, and offering environmentally-friendly benefits by reducing medical waste.
