

Light-Weight Sterilization Case

Innovative Medical Products

Innovative Medical Products has introduced an easy-to-handle, light-weight sterilization case that accommodates any combination of IMP boots and sterile clamps. Weighing just ten pounds with accessories, the new sterilization case is conveniently stackable. Moreover, the IMP case improves the handling efficiency in the OR's sterile field versus individually wrapped components. It has been reduced in size from the larger case and is designed to hold just the boot and clamp accessories, while IMP's larger sterilization case can accommodate the De Mayo Universal Distractor™, as well as the boot and clamp. Another IMP sterilization case is designed to hold the knee positioner base plate. All IMP sterilization cases meet the new hospital guidelines for weight standards.
