

Aluminum Wireless Auto-Locking Cart

Armstrong

Armstrong has introduced the Aluminum Wireless Auto-Locking Cart. The cart features keyless entry, an LCD display (shows date, time of day, current battery life, and programmable menu driven display system that prompts you to each additional command), integrated 802.11g wireless capabilities with wireless antenna, up to 5,000 user codes, supervisor code for programming, and manual or automatic locking. The cart also has many customizable auto-locking features, so it fits whatever security needs you have.
