

Battery-Powered Mobile Video Cart

Quest International

Quest International, Inc. announced the availability of the AlphaView Battery-Powered Mobile Video Cart. The newly announced wireless HD video, surgical display system features a 32 inch, 2.3 megapixel medical-grade LCD on a heavy-duty battery-powered mobile cart. Under typical operating conditions, the AVC2F4P-CART will power the 32 inch LCD monitor for up to 8 hours between charges. The AlphaView mobile video system ships complete with a medical-grade 32 inch HD LCD, heavy-duty rolling cart, foot pedal controlled height adjustable mounting column, 76.8 Ah (Amp-Hour) lithium-ion battery pack and 60GHz HD video receiver and transmitter, allowing picture-perfect wireless reception up to 10 meters from the video source. The 32 inch (1,920 x 1,080) medical-grade display produces HD images with over 2 million pixels and a 1300:1 contrast ratio, delivering the superb image quality needed in surgical settings.
