## Digiview 250

Kubtec

Kubtec announces the Digiview 250, a flat panel detector. This low dose, high-resolution detector is ideal for neonatal, pediatric and extremity imaging. The Digiview 250 weighs less than seven lbs., has a high resolution - 96 $\mu$  pixel size, 14 bit contrast with a 20 cm x 25 cm active imaging area and integrates with any existing X-ray source.
