Divider Label Tabs

Akro-Mils

Akro-Mils introduces Divider Label Tabs, which attach to existing dividers to improve the visibility of bin labels and scanning of barcodes. The Divider Label Tab features an angled face that allows users to clearly see the label of each compartment of a divided bin without moving contents. The label face accepts standard 1" x 3" adhesive labels. Ideal for efficiency initiatives such as 5S Lean, Kanban and JIT, the Divider Label Tab can be offset like file folder tabs to keep multiple labels visible in the bin. The tabs are designed to sit nearly flush with the top of Shelf Bins and ShelfMax Bins, and will not snag on shelving units.
