

## **McCarthy Mini-Sternotomy Retractor with Universal Lift**

Kapp Surgical Instruments

Kapp Surgical Instruments, Inc. offers the McCarthy Mini-Sternotomy Retractor with Universal Lift, a self-retaining retractor that provides excellent exposure for a variety of valve operations, Maze procedures, or other intra cardiac procedures. It can be used for coronary artery bypass operations or for mini-sternotomy procedures depending upon the patient's size. The removable lift attachment allows for better exposure for valve procedures.
