

The Protector

Innovative Medical Products

Innovative Medical Products has developed 'The Protector,' a unique approach for pressure redistribution and to assist in the prevention skin chafing. The Protector is an easy-to-apply gel guard that adheres to the skin and serves as a defense from sources of irritation. The Protector comes in four standard sizes that provide comfort while exuding an FDA grade white mineral oil. The oil is excellent at softening the skin and assists in healing. The IMP solution is particularly effective in providing protection and relieving pain and discomfort at surgical sites where the patient's belt, straps or other clothing items irritate.
