

Retractors For Spine Surgery

Millennium Surgical

Millennium Surgical has announced an extensive offering of US and German made retractors for use in spine surgery. Cloward-style blade retractors for use in cervical procedures are offered in three styles, with long angled lip, short angled lip, and without lip. T-handled McElroy and Taylor retractors for use in lumbar spine procedures are offered in a variety of depths. Self-retaining retractors including titanium McCulloch retractors, Anterior Cervical Retractors, and a tube/port system with positioning arm for minimally Invasive lumbar micro discectomy. Custom retractors are also available.
