

Smart-Fold Sterilization Wrap

Kimberly-Clark

Kimberly-Clark announced the launch of Kimguard Smart-Fold Sterilization Wrap, an innovative sterilization packaging designed to provide the durability necessary for the most demanding applications. Smart-Fold features triple-layer reinforcement to protect the heaviest procedure trays and loaner sets from tears and cuts that can occur during handling. The extra reinforcement also translates to fewer trays being returned for reprocessing. Smart-Fold also includes the Quick Check feature, combining a blue wrap layer with a white inner layer so users can quickly and easily identify if sterility has been breached.
