CHROMOPHARE

Berchtold

Berchtold's CHROMOPHARE F Generation with Precision Beam Technology is a patented, ultrathin, highly maneuverable design focusing 650 beams of overlapping light into a deep, homogenous column with ideal depth of illumination and superior shadow control. Berchtold's optics research and development team devised Precision Beam Technology to harness the power of 104 highly efficient LEDs that precisely reflect, multiply, and redistribute light onto the surgical field.
