

## CoolDog

CoolShirt Systems

CoolShirt Systems offers the CoolDog, a.k.a. the Safetemp TEC, a new "iceless" personal cooling system. The CoolDog operates quietly and is under 2 feet high to easily stay out of the way of staff. OR Surgeons and staff won't perspire, suffer heat-induced fatigue or lose concentration. This easy-to-use "iceless" unit cools or warms, and is compatible with any CoolShirt that uses water.
