

Fire-Resistant Cart Covers

Edgeco

Edgeco's fire-resistant cart covers keep clean linens clean, protect against contamination and meet current regulations of the Joint Commission on Accreditation of Hospitals. Features of the covers include reinforced corners and wear points for extra durability, double-sewn seams for extra strength, and fabrics that are selected for maximum serviceability. Fabrics offered include heavy duty, machine washable Denier Nylon cloth; EDGECO'S "sponge wipe clean" soil-resistant vinyl-laminated nylon material and an anti-bacterial fabric for infection control applications. Custom-designed for exact fit, taking into account not only the size of the cart, but its purpose, and the special needs of the institution where it will be used.
