

Instrument Tray Rack

Healthmark Industries

Healthmark Industries announces the new Osteotome Rack to its Protech instrument trays line. The innovative design keeps osteotome tips from damage during transportation and reprocessing. These racks make it easy and safe for handling in and out of the OR. The racks are PTFE-padded for complete edge protection with a fully-flanged frame for a lightweight but durable design. Angled slots retain a maximum of 12 instruments in place when the bars are down.
