Needle Counter Box

AMI

AMI presents the Sharps Safety Station needle counter box. The box has several safety features, including three safety hinges that can be unhinged easily without breaking, Auto-Lock snaps that easily close and reopens for recount if necessary, overlapping walls that keep sharps securely in the box, a one-handed scalpel blade remover, two spaces for safely holding scalpels, and a built-in syringe holder with one-handed operation of the needle recapping and one handed for exchanging needles. All size boxes are available with magnetic, foam block, foam strip, and adhesive surfaces.
