

## ShrinkSafe Bands

Medi-Dose / EPS

Medi-Dose / EPS has widened its popular line of ShrinkSafe Bands to include five new sizes, imprinted with “SEALED FOR YOUR PROTECTION,” for use with vials, syringes and bottles. Easily applied to various sized items, a quick exposure to heat shrinks the band to the container’s shape. The bands work on both child resistant or regular screw caps, and are excellent protection for drugs with abuse potential, expensive antibiotics, and meds requiring special handling. Perforations on the bands allow for meds to be quickly dispensed and administered.
