

Concentrated Instrument Cleaning Formulations

Steris

Steris offers Prolystica 2X concentrated instrument cleaning formulations, which are proven solutions for manual cleaning and for automated washing systems. Prolystica 2X products are flexible, fast-acting formulations for all cleaning needs. Prolystica chemistries are meant to provide superior cleaning, rinse away easily and are biodegradable. They help maintain and protect instrument/device surfaces and functions. In addition, they come in a convenient one-gallon size that is newly labeled for user-friendly identification and manual process use.
