

Microscope Drapes

Ecolab

Ecolab Inc. announced the availability of the Vari-Lens2 line of microscope drapes that help optimize visual accuracy for surgeons while maintaining an effective sterile barrier. The design enhancements of the Vari-Lens2 products include an easier to maneuver objective lens cover and an angled, glass lens that provides durable scratch resistance and improved light transmission to enhance definition while at the same time reducing glare. For additional convenience, the products are available in three different sizes and are designed to fit nearly every Leica and Zeiss microscope on the market.
