

Innovative Medical Products Porta-View

The Porta-View from Innovative Medical Products lets surgeons view X-ray films right next to the operating room table. The sturdy, maneuverable stand frees surgeons, especially those performing delicate, intricate procedures, from having to leave the O.R. table to view X-rays. The Porta-View is ideal for surgery centers and new facilities that don't always need or want to install mounted light boxes in all of their operating rooms. The Porta-View holds two standard sized X-ray films side-by-side. The maneuverable IMP solution has a heavy, wide-wheeled base that prevents tipping over when moved.
