

Cordless Ultrasonic Dissection Device

Covidien

2013 ESP Award Nominee

The Sonicision cordless ultrasonic dissection device from Covidien is a hand-held, battery-powered surgical instrument. The unique cordless design and simplified set-up of the Sonicision system allow for more freedom of movement and better efficiency in the operating room. Sonicision delivers ultrasonic vibrations, which simultaneously cut and coagulate tissue. The device has been shown to deliver faster dissection through tissue and less plume for improved visibility in the surgical field.
