

Examination Glove

Sempermed

Sempermed is pleased to introduce its new StarMed Ultra Nitrile examination glove. StarMed Ultra Nitrile is the latest addition to the StarMed family. StarMed Ultra Nitrile is manufactured with a second generation nitrile formula, providing an incomparable fit and feel without sacrificing the protection and peace of mind healthcare workers demand. This unique formula reduces tackiness thus allowing for a quick and easy don. And, StarMed Ultra Nitrile also carries the new Smart Dispense Technology, Single Glove Delivery System seal ensuring each box is packed to perfection and dispenses one glove at a time. This new technology is proven to eliminate unnecessary hassle and waste. Additionally, each box of StarMed Ultra Nitrile contains 250 gloves (225 XL), providing even greater efficiencies to those in need of hand protection.
