Sonic Irrigator

Medisafe America

Medisafe America offers the Sonic Irrigator-PCF. The product is tested and validated for cleaning da Vinci EndoWrist instruments using the same critical cleaning parameters as Intuitive Surgical's manual cleaning method. With optional built-in Class II, low level thermal disinfection capability, users can save as much as 45 to 60 minutes off reprocessing time by combining cleaning and disinfection steps into one process; enzymatic detergent wash, lumen flushing, simultaneous ultrasonic cleaning cycle, finalized with a 190 degrees Fahrenheit thermal rinse (both inside and out) for safe, low level instrument disinfection.
