

# Vertical Platform Wheelchair Lifts

Butler Mobility

Butler Mobility's vertical platform wheelchair lifts are durable, easy to operate and virtually maintenance free. Indoors or outdoors, the Butler Mobility Vertical Platform Lift is a practical alternative to installing cumbersome, slow grade ramps. Butler Mobility has a long history of manufacturing the "Lifts that Last" with their popular Inclined Platform Lift for wheelchairs. This Platform Lift is adjustable to lift or lower to the exact height required by the individual consumer. The easy to use control paddle and key lock make it a safe and reliable means of staying independent and mobile. Standard safety features include 42" high solid side panels, automatic folding access ramp, emergency stop switch, non skid platform and ramp, powder coated finish with weather sealed controls, manual emergency crank, constant pressure control with key lock, and bottom safety pan.
