

The GAMMEX Non-Latex PI Micro Surgical Gloves

Ansell

The GAMMEX Non-Latex PI Micro Surgical Gloves from Ansell offer exceptional dexterity, tactical sensitivity, and at the same time, outstanding strength and barrier protection. The GAMMEX Non-Latex PI Micro is ideal for delicate procedures without the risks associated with natural rubber latex sensitization. GAMMEX Non-Latex PI Micro can also serve as an underglove. Its micro-thickness allows for comfortable double-gloving. Along with Ansell SureFit Technology, GAMMEX Non-Latex PI Micro surgical gloves provide surgeons, nurses and other healthcare professionals with superior protection during OR procedures.
