Spill Kit In A Cabinet

New Pig

New Pig has introduced the hi-viz, padlockable PIG Spill Kit in a cabinet. The unit arrives assembled, complete with adjustable shelves, and ready to serve as a central spill response center. The safety-yellow, heavy-gauge steel “Spill Response Center” is easy to locate and includes PIG BLUE Socks, PIG Mat and Pillows, wipers, and temporary disposal bags with ties. The cabinet’s lockable drawers are ideal for PPE, patch and repair supplies and other items critical to quick response. Tamperproof seals help to prevent pilfering of spill response supplies. The cabinet also features adjustable shelves and a coat rack.
