

# Scintillant Surgical Light

Engineered Medical Solutions

Scintillant Surgical Light from Engineered Medical Solutions is a sterile, single-use, focused illumination device to help improve visualization. This battery powered light can be used with the supplied accessories and does not require a bulky external light source, thus eliminating the need for clumsy cords and awkward headgear. The device can also be used independently as a hand-held light source. Features include:

- Focused, high-intensity white LED
- Flexible wand for precise illumination
- Cordless, battery powered LED tip
- Three Configurations available
- Ergonomic rubberized grip
