## Face Shield

InTec Industries, Inc.

InTec Industries, Inc. announced an addition to its SAFEMARK line of disposable eye and face protection product line. The new SAFEMARK Anti-Glare face shields and shield-mask combination product lines, now offer shields that will significantly reduce the glare caused by a reflection of light on a surface. The shields are made from a high quality optical grade film that is treated with an anti-glare coating that blocks 97 percent of the glare. One of the highest in the industry. The face and eye shield-mask combinations are offered in a variety of designs and the shields for face masks can be attached to any style flat mask. As with all SAFEMARK products the anti-glare shields are made from high quality materials that are latex free, hypoallergenic and meet or exceeds the CDC guidelines and OSHA 29 CFR part 1910.1030 requirements for protection against harmful pathogens.
