

Pretzel-Shaped Laparoscopic Retractors

CareFusion

CareFusion introduced a 3mm version of its Snowden-Pencer pretzel-shaped laparoscopic retractors. The 3mm shaft enables even smaller incisions and is designed to promote faster recovery time, minimize scarring through smaller incisions, and reduce post-operative pain and trauma for the patient. CareFusion's Snowden-Pencer pretzel-shaped laparoscopic retractors (both 3mm and 5mm) allow surgeons easier access, visualization, and leverage when manipulating larger organs and structures compared to other retractors.
