Rebuilt Surgical Tables

H&S Medical

H&S Medical rebuilds surgical tables at huge cost savings. On average, rebuilding costs about \$30,000 less than buying new table. An H&S rebuilt table functions and has the same warranty as a new table and is completely rebuilt inside and out. General surgery tables, fracture tables, and imaging tables are all rebuilt to original specifications. Table inspections on site are without charge and staff is encouraged to join in the inspection process with our technician.
