

MatriStem Pelvic Floor Matrix

ACell, Inc.

ACell, Inc., announced that it has expanded the MatriStem Pelvic Floor Matrix product portfolio with the addition of four device sizes. The addition of four new sizes to the portfolio offers a broad range of viable solutions for physicians treating patients in need of pelvic floor repair. MatriStem Pelvic Floor Matrix is a naturally-occurring, non-synthetic scaffold that provides a unique balance of strength and pliability for use in repair of anterior, posterior, and apical defects. Comprised of proprietary Urinary Bladder Matrix (UBM), MatriStem Pelvic Floor Matrix is intended for implantation to reinforce soft tissue where weakness exists in urological and gynecological anatomy including vaginal prolapse repair, reconstruction of pelvic floor, and pubourethral support. MatriStem Pelvic Floor Matrix is currently available in 9x9x12cm (trapezoid) size, with four new sizes being added to the product line: 5x5cm, 4x12cm, 7x10cm and 10x15cm.
