

# Radiance G2 High-Bright Display

NDS Surgical Imaging

Featuring a long-life LED backlight and NDSsi's proprietary Color Correction Technology (CCT), the 26" Radiance G2 High-Bright display is calibrated in accordance with the BT.709 color standard. This factory calibration provides consistent color reproduction and accurate grayscale response. Ideal for use with HD endoscopic cameras, the 26" Radiance G2 HB supports two 3G-SDI inputs and an optional single-fiber input, making it suitable for the most advanced digital OR installations.
