

HARMONIC ACE+7 Shears With Advanced Hemostasis

Ethicon Endo-Surgery, Inc.

Ethicon Endo-Surgery, Inc.

(Ethicon) announced the launch of HARMONIC ACE +7 Shears with Advanced Hemostasis (HARMONIC ACE+7), the first purely ultrasonic device with a 7 mm sealing indication. HARMONIC ACE+7 combines the precision and multi-functionality expected of HARMONIC with reliable large vessel sealing; a benefit combination that does not exist in any other product, representing a true breakthrough in ultrasonic energy technology. The HARMONIC ACE+7 is setting a new standard in ultrasonic energy by demonstrating larger vessel sealing strength using the Advanced Hemostasis mode. HARMONIC ACE+7 is designed for use in numerous procedures and specialties including general, colorectal, bariatric, gynecology, thoracic, and urology, enhancing surgeons' ability to handle multiple jobs with superior precision. The new HARMONIC ACE+ 7 is best suited for cases which require dissection, mobilization, and large vessel sealing.
