

ZIPLift IV System

Published on Surgical Products (<http://www.surgicalproductsmag.com>)

ZIPLift IV System

The new ZIPLift IV System from Innovative Medical Designs: A system to manage and organize IV equipment in-room as well as during patient transport. The System safely and easily transfers the IV Pole and equipment to and from the bed.

- Maintains the same setup outside the room as inside the room
- Works with any bed & any stretcher, no special attachments
- Works throughout the entire hospital
- Improves productivity & patient care
- Allows clear head access
- Maintains constant relationship of IV equipment to the patient
